

NORTHAMPTON, BUCKS COUNTY, MUNICIPAL AUTHORITY

Dear Northampton Residents:

In line with the Authority's responsibility to maintain accurate plans of water and sewer improvements in your area, Authority employees and our consultant's may need to enter your land in order to conduct surveys and engineering studies to gather information. Currently the Authority has authorized our engineer Pennoni Associates to prepare an internet based web enabled geographic information system (GIS) to display the Authority's water and sewer system. For this project, Pennoni Associates will be surveying existing water and Sewer facilities. This work may involve survey along your property for the purposes of developing the Township wide System Map.

Please be assured that our entry to conduct these studies **DOES NOT** mean that your property has been selected for any improvements. In the event that a water or sewer improvement would affect your property, you would be personally contacted by the Authority.

Our studies will be performed as courteously and as quickly as possible.

Should you have any concerns regarding worker's entry, please notify Chris Walker, P.E., the Authority Engineer at 215 589 6003.

We appreciate your cooperation and assistance in our task of documenting and planning a better Systems Mapping of water and sewer for the residents of Northampton.

Sincerely,

Thomas A. Zeuner
Executive Director
